Cholecalciferol is a form of vitamin D which is naturally synthesized in skin and functions as a pro-hormone, being converted to calcitriol. This is important for maintaining calcium levels and promoting bone health and development. As a medication, cholecalciferol may be taken as a dietary supplement to prevent or to treat vitamin D deficiency.

5.2.3. Anti H. pylori natural products. Using synthetic antimicrobials such as currently approved antibiotics (amoxicillin and clarimycin) for eradication of H. pylori has limitations due to potential development of resistance and low compliance (Debets-Ossenkopp et al., 1999). So new research has been developed in natural products with anti H. pylori activity.

Vitamin D 3 wird, vor allem gebunden an das Vitamin-D-bindende Protein, über das Blut in die Leber transportiert. Dort wird es von dem Enzym Cytochrom P450 2R1 in den Mikrosomen zu Calcidiol (25(OH)-Vitamin-D 3) hydroxyliert. Eine frühere Vermutung, dass diese Reaktion auch in den Mitochondrien stattfindet, wurde inzwischen widerlegt.

Par Lydie.G. Nous devons aller aux Canaries et à Madère, mais nous n'y sommes pas allés car soit disant, trop de mauvais temps et trop risqué ! Le nouvel itinéraire (donné juste après l'enregistrement) ne nous convenait pas du tout car nous connaissions toutes les escales et il est sûr que nous n'aurions jamais réservé cette croisière si cet itinéraire nous avait été proposé !
