

Angular 2 Filetype

Angular 2 Filetype

Uploading files in Angular (2/4) to a REST api. I haven't written any Angular(2(/4)(+)(wtf?)) posts so far - but since I've been working with Angular (okay, let's just call it Angular) for some time now let's do so. An interesting thing about Angular is that uploading files is barely handled by anyone.

Basics. Google hacking involves using advanced operators in the Google search engine to locate specific strings of text within search results. Some of the more popular examples are finding specific versions of vulnerable Web applications. A search query with intitle: admbook intitle: Fversion filetype: php would locate all web pages that have that particular text contained within them.

I tried to use `return reader.result` from the `getBase64()` function (rather than using `console.log(reader.result)`) because I want to capture the base64 as a variable (and then send it to Google Apps Script). I called the function with: `var my_file_as_base64 = getBase64(file)` and then tried to print to console with `console.log(my_file_as_base64)` and just got undefined.

How to convert file to base64 in JavaScript? - Stack Overflow

Search For a Specific Text Within a String. The PHP `strpos()` function searches for a specific text within a string. If a match is found, the function returns the character position of the first match. If no match is found, it will return `FALSE`.

PHP 7 Strings - w3schools.com

PHP is a server scripting language, and a powerful tool for making dynamic and interactive Web pages. PHP is a widely-used, free, and efficient alternative to competitors such as Microsoft's ASP.
