The mission of Cognitive Coaching SM is to produce self-directed persons with the cognitive capacity for excellence both independently and as members of a community. Research indicates that teaching is a complex intellectual activity and that teachers who think at higher levels produce students who are higher achieving, more cooperative, and better problem solvers.

Cognitive apprenticeship is a theory that emphasizes the importance of the process in which a master of a skill teaches that skill to an apprentice.. Constructivist approaches to human learning have led to the development of the theory of cognitive apprenticeship. This theory accounts for the problem that masters of a skill often fail to take into account the implicit processes involved in ...

Why do we call it Meta-Coaching? Mostly because we coach from higher or meta-levels. Also because we have seven meta-models that form the systematic framework of Meta-Coaching. Yet these are not the only reasons, there are more reasons for calling it Meta-Coaching.. 1) Meta-coaching is meta to content.
