

Core Textbook Of Respiratory Care Practice

Core Textbook Of Respiratory Care

Respiratory care is a discipline that uses scientific principles to carry out physician directed diagnosis and treatment of abnormal respiratory conditions. Respiratory care practitioners work in a variety of settings, including hospitals, medical clinics, skilled nursing facilities, home care, research, education and medical equipment sales.

Drowning is defined as respiratory impairment as a result of being in or under a liquid. Drowning typically occurs silently, with only a few people able to wave their hands or call for help. Symptoms following rescue may include breathing problems, vomiting, confusion, or unconsciousness.

Drowning - Wikipedia

Breathing (or ventilation) is the process of moving air into and out of the lungs to facilitate gas exchange with the internal environment, mostly by bringing in oxygen and flushing out carbon dioxide.. All aerobic creatures need oxygen for cellular respiration, which uses the oxygen to break down foods for energy and produces carbon dioxide as a waste product.

Breathing - Wikipedia
