In July 2009, a horrific car accident that claimed the lives of eight people in New York led to more questions than answers in its aftermath. Thirty-six-year-old Diane Schuler drove down the wrong side of the Taconic State Parkway, crashing into an SUV. Schuler, her daughter, and her three nieces died in the crash along with three passengers in the SUV.

In particle physics, an elementary particle or fundamental particle is a subatomic particle with no sub structure, thus not composed of other particles. Particles currently thought to be elementary include the fundamental fermions (quarks, leptons, antiquarks, and antileptons), which generally are "matter particles" and "antimatter particles", as well as the fundamental bosons (gauge bosons ...
