Gorillas In The Myth A

Gorillas are ground-dwelling, predominantly herbivorous apes that inhabit the forests of central Sub-Saharan Africa. The genus *Gorilla* is divided into two species: the eastern gorillas and the western gorillas (both critically endangered), and either four or five subspecies. They are the largest living primates. The DNA of gorillas is highly similar to that of humans, from 95 to 99% depending on ...

In the beliefs of the Nation of Islam (NOI), Yakub (sometimes spelled Yacub or Yaqub) was a black scientist who lived "6,600 years ago" and began the creation of the white race. He is said to have done this through a form of selective breeding referred to as "grafting", while living on the island of Patmos. Scientific consensus rejects the historicity of this figure.

Amazing For a long time the UN has said we will peak at 9 billion. Well, at first it was 11 billion, but with the current birth dearth crisis, it appears it will never see that day. 8 billion is a lot, but considering that the population is also aging at an unprecedented rate, we will lose a greater portion of our population.
