## **Handwriting Analysis The Art And**

Graphology (or graphoanalysis, but not graphanalysis) is the analysis of the physical characteristics and patterns of handwriting claiming to be able to identify the writer, indicating the psychological state at the time of writing, or evaluating personality characteristics. It is generally considered a pseudoscience. The term is sometimes incorrectly used to refer to forensic document ...

Resilience in Handwriting Analysis. The term “resilience” comes from Latin “resilio”: which means bouncing, reemerging. From the field of Physics: the ability materials have to get back to their original shape after they have been deformed due to the presence of an outer impact. There are circumstances that change our lives or the life project we someday sketched.

Handwriting recognition (HWR) is the ability of a computer to receive and interpret intelligible handwritten input from sources such as paper documents, photographs, touch-screens and other devices. The image of the written text may be sensed "off line" from a piece of paper by optical scanning (optical character recognition) or intelligent word recognition.

While Poizner cautions that she typically views handwriting within the scope of a patient's other modes of expression—such as drawings, jokes, or stories—she nonetheless affirms that one's way of putting pen to paper can often reveal significant parts of a personality that may otherwise be latent. If, she says, after doing so, the same “behavioral maneuvers” inferred from the ...
