The largest group of geothermal power plants in the world is located at The Geysers, a geothermal field in California, United States. As of 2004, five countries (El Salvador, Kenya, the Philippines, Iceland, and Costa Rica) generate more than 15% of their electricity from geothermal sources. Geothermal electricity is generated in the 24 countries listed in the table below.

Laki or Lakagígar (Craters of Laki) is a volcanic fissure in the south of Iceland, not far from the volcanic fissure of Eldgjá and the small village of Kirkjubæjarklaustur. The fissure is properly referred to as Lakagígar, while Laki is a mountain that the fissure bisects. Lakagígar is part of a volcanic system centered on the volcano Grímsvötn and including the volcano Thordarhryna.

Geology - Study of surface features and processes: Geomorphology is literally the study of the form or shape of the Earth, but it deals principally with the topographical features of the Earth's surface. It is concerned with the classification, description, and origin of landforms. The configuration of the Earth's surface reflects to some degree virtually all of the processes that take ...

Europe: Europe, second smallest of the world's continents, composed of the westward-projecting peninsulas of Eurasia (the great landmass that it shares with Asia). It occupies nearly one-fifteenth of the world's total land area. The long processes of history marked it off as the home of a distinctive civilization.
