Debits and credits occur simultaneously in every financial transaction in double-entry bookkeeping. In the accounting equation, $Assets = Liabilities + Equity$, so, if an asset account increases (a debit (left)), then either another asset account must decrease (a credit (right)), or a liability or equity account must increase (a credit (right)). Note also that in the extended equation, revenues ...

Tax deduction is a reduction of income that is able to be taxed and is commonly a result of expenses, particularly those incurred to produce additional income. Tax deductions are a form of tax incentives, along with exemptions and credits. The difference between deductions, exemptions and credits is that deductions and exemptions both reduce taxable income, while credits reduce tax.
