The Rainbow From Myth To

The Rainbow Serpent or Rainbow Snake is a common deity (also known as Wagyl, Wuagyl, etc.) often seen as a creator god and a common motif in the art and religion of Aboriginal Australia. It is named for the identification between the shape of a rainbow and that of a snake. Some scholars believe that the link between snake and rainbow suggests the cycle of the seasons and the importance of ...

Rainbow Serpent - Wikipedia

A rainbow is a meteorological phenomenon that is caused by reflection, refraction and dispersion of light in water droplets resulting in a spectrum of light appearing in the sky. It takes the form of a multicoloured circular arc. Rainbows caused by sunlight always appear in the section of sky directly opposite the sun. Rainbows can be full circles.

The radius of a rainbow is determined by the water droplets' refractive index. A refractive index is the measure of how much a ray of light refracts (bends) as it passes from one medium to another—from air to water, for example. A droplet with a high refractive index will help produce a rainbow with a smaller radius. Saltwater has a higher refractive index than freshwater, for instance, so ...

Iris was the ancient Greek goddess of the rainbow and the messenger of the Olympian gods. She was often described as the handmaiden and personal messenger of Hera. Her name contains a double meaning, being connected the Greek words for both rainbow and messenger. Iris was depicted as a beautiful young woman with golden wings, a herald's rod, and sometimes a water-pitcher in her hand.

In 1531 the Incas came under attack by Spanish conquistadors. The following year their empire fell. The Spanish began converting the Indians to Christianity and wiping out pagan traditions and practices. However, some Spanish military and religious personnel recorded what they learned about Inca mythology, as did a few of the newly Christianized and educated Incas.
