### **Ultra High Resolution Photo**

Ultra-high-definition television (also known as Ultra HD television, Ultra HD, UHD TV, UHD and Super Hi-Vision) today includes 4K UHD and 8K UHD, which are two digital video formats with an aspect ratio of 16:9. These were first proposed by NHK Science & Technology Research Laboratories and later defined and approved by the International Telecommunication Union (ITU).

Most of the newer digital cameras have plenty of resolution for beginning photographers to make reasonably sized prints, which means the maximum resolution in a digital camera isn't as important as it used to be. In other words, most new digital cameras can shoot what are considered high-resolution photos.

HF-12M is a series of prime lenses that produce ultra-sharpness with 2.7µm pixel pitch (equiv. to 8MP) in the whole frame area. HF-12M lenses maintain a high level of even sharpness at the center as well as around the edges, and mitigating resolution degradation that typically occurs when changing a working distance or aperture value.

The graphics display resolution is the width and height dimension of an electronic visual display device, such as a computer monitor, in pixels. Certain combinations of width and height are standardized and typically given a name and an initialism that is descriptive of its dimensions. A higher display resolution in a display of the same size means that displayed photo or video content appears ...
